## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. 4,722,996 (Kanai et al).

Kanai et al disclose a polyamide resin comprising a caproamide component and/or a hexamethylene adipamide component having hydrocarbon end groups. The composition is useful for the production of under-hood materials for motorcars including the productions of gears (column 1, lines 29-41). The polyamide is represented by nylon 6, nylon 66 or copolymers thereof (column 2, lines 35-41).

The reference differs in essence from the present claims in not expressly exemplifying a polymer blend of nylon 66 and nylon 6 or a copolymer thereof having the weight ratio presently specified. It is maintained that the reference's silence relative to the weight ratio of the nylon components is tantamount to suggesting that any weight ratio (inclusive of that presently claimed) can be used with the reasonable expectation of success. Accordingly, absent evidence of unusual or unexpected results relative to the presently claimed weight ratio, no patentability can be seen in the claimed subject matter.
